Completing a risk assessment isn't difficult. Its purpose is to identify any possible hazards that have the potential to cause harm and assess how likely that harm is to happen – in other words, “What is the risk of that happening, of harm actually being caused?”

An example: we've said the site is subject to high winds. A heavy-duty gazebo is heavy and could cause physical injury if blown over by a strong gust. Is that likely to happen? Yes, especially when the show is underway. The safest course of action is not to use such gazebos – but we know this is impractical. Tying or strapping the gazebo down in an appropriate manner would prevent it being moved by strong gusts. The likelihood of harm being caused now is much reduced, it's now controlled.

In a nutshell, the hazard was identified, its potential to cause harm assessed, and a control measure put in place to reduce the risk to an acceptable level or maybe even remove it.

Of course, the guy ropes/straps create another risk – that of trip or snagging. Are they likely to cause harm? Yes. Can it be controlled? Yes, by making them very visible, or better still, inaccessible by the placement of displays or stock!

Apply this method to carrying out your risk assessment and you'll have it done in no time at all. More importantly, you will have a legal document that shows you have acted diligently.

Finally – if in doubt **ASK**. We want you and our visitors to have a memorable and safe show. Thank you for helping to make this a reality!
