Reenactor(s)

Type (please tick)	Military []	Home Front []	Other []
Brief Description Please describe your role, how you interact with the public, and what you wish to achieve at the show.			

Some necessary rules

1. **Camping on your display:** we strive to maintain a uniquely 1940s environment within the Camp side of the show. Anything used or displayed this side must be of the period. Post 1949 tentage, vehicles or equipment are not permitted.
2. **Free plastic camping:** living history groups are entitled to 2 free pitches in public camping. In 2019 thirty pitches were requested but went unused. This was a financial loss to the show we can ill afford. For 2023 we will require a deposit of 50% (£20 or £30 per pitch depending on size) at time of booking. This deposit will be returned in full once occupancy of the pitch is confirmed. The deposit will be refunded if the pitch request is cancelled no later than 30 days before the event.
3. **Dress:** all participants must be in period dress/uniform between 1000 and 1700hrs on show days.
4. **Live firing:** All live firing must be kept to the battlefield only.
5. **Vehicle movements:** No vehicle movements are permitted between 0915 and 1730hrs on show days unless they are:
 - a. part of a display/re-enactment and have been authorised for movement by the event manager.
 - b. in response to an emergency.

In all cases vehicle movement must be sanctioned and subject to security/steward escort.

Completing a risk assessment isn't difficult. Its purpose is to identify any possible hazards that have the potential to cause harm and assess how likely that harm is to happen – in other words, “What is the risk of that happening, of harm actually being caused?”

An example: we've said the site is subject to high winds. A heavy-duty gazebo is heavy and could cause physical injury if blown over by a strong gust. Is that likely to happen? Yes, especially when the show is underway. The safest course of action is not to use such gazebos – but we know this is impractical. Tying or strapping the gazebo down in an appropriate manner would prevent it being moved by strong gusts. The likelihood of harm being caused now is much reduced, it's now controlled.

In a nutshell, the hazard was identified, its potential to cause harm assessed, and a control measure put in place to reduce the risk to an acceptable level or maybe even remove it.

Of course, the guy ropes/straps create another risk – that of trip or snagging. Are they likely to cause harm? Yes. Can it be controlled? Yes, by making them very visible, or better still, inaccessible by the placement of displays or stock!

Apply this method to carrying out your risk assessment and you'll have it done in no time at all. More importantly, you will have a legal document that shows you have acted diligently.

Finally – if in doubt **ASK**. We want you and our visitors to have a memorable and safe show. Thank you for helping to make this a reality!
